## SUPREME T-SHIRT

Supreme fabric is one of the most used fabric types in the textile industry. It is usually produced using high quality knitting or weaving techniques. The surface of the fabric is generally smooth and soft. It allows prints and colors to be reflected vividly. Supreme fabrics generally have breathability. It gives a feeling of comfort when in contact with the skin and allows air circulation, ensuring that the user does not sweat and feels comfortable.

# POLO COLLAR COMBED COTTON T-SHIRT

Combed cotton fabric is a prominent fabric type in the textile industry. Combed cotton, which is a lightly woven form of cotton fabric, provides perfect comfort and convenience to the wearer. It has good air permeability thanks to the openings between the fibres. This reduces sweating and allows the skin to breathe. At the same time, it adapts to the body structure and offers comfortable mobility.
